Summary

Generative AI application developer with hands-on expertise in building AI agents in Python, and a solid foundation in machine learning techniques for predictive modeling using Python. Skilled in Azure AI Services and Google Cloud Platform and, with a keen interest in building scalable AI solutions on the cloud

Professional Experience

01/2022 – Present **Technology Analyst**
Infosys Ltd 
Microsoft AI Foundry | Azure Infrastructure | DevOps | Agents

Education

06/2016 – 07/2020 **B. Tech Biotechnology**
Kolkata, India *Techno India University*

Skills

Generative AI & Agents

Azure AI Foundry, LangGraph, Claude SDK, Google ADK, RAG Pipelines, MCP Server, Azure AI Search

Frontend & Backend APIs

React.js, Next.js, Streamlit
Python FastAPI, Node + express

Machine Learning

Supervised & Unsupervised Learning, Regression, KNN, SVM, Random Forest, PyTorch

Cloud & DevOps:

Azure Core services, Shell Scripting, Linux, FinOps, Terraform, Github Actions

Projects

GCP Terrabuilder

- Developed an AI tool that generates Terraform modules directly from architecture diagrams
- Designed and implemented the frontend UI and integrated Google ADK for agent-based API workflows
- Enabled diagram-to-IaC automation, reducing manual cloud provisioning effort

AI-Powered Cloud FinOps GenAI Platform

- Developed a Cloud FinOps platform using Python to analyze and optimize multi-cloud spend data
- Built an data ingestion pipeline to process FOCUS CSV cost reports into Azure SQL for unified cost visibility
- LLM-based cloud cost insights
- AI-driven optimization recommendations
- Natural-language FinOps chatbot for business users

Certificates

- Infosys Certified Applied Generative AI Professional
- Microsoft Azure AI Fundamentals
- Agentic AI for Developers and Architects
- Google Cloud Digital Leader

Interests

- Street Photography
- Mandala Art
- Rock History
